### DETAILED ACTION

This is in response to a request for reconsideration filed on January 1<sup>st</sup>, 2004

#### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-66 rejected under 35 U.S.C. 102(e) as being anticipated by Maytal et al (U.S. Patent No 6,715,079).

3. As per claim 1, Halstead et al teach a method of providing an initial good to a computer wherein the initial digital good include a plurality of selectively arranged parts in an initial configuration and the initial digital good is configured as to not properly function with the computer receiving unique key data converting the initial good into a modified digital good using unique key data to selectively individualize the initial digital with at least one computer such that the plurality of selectively arrange parts in the modified digital good have been rearrange to have a substantially unique operative configuration tat properly functions with the computer and is

different that the initial configuration and causing the at least one computer to run the modified digital good (*see columns 5 lines 56-6 line 5, 10 lines 16-52*).

4. As per claims 2-66, they disclose the same inventive concept as claim 1. Therefore, they are rejected under the same rationale.

### *Response to Arguments*

5. Applicant's arguments filed January 1<sup>st</sup>, 2005 have been fully considered but they are not persuasive.

a. Applicant argue that the prior art fail to teach an inventive such that the plurality of selectively arranged parts in the modified digital good have been rearranged to be operatively different. Examiner respectfully disagrees with Applicant's characterization of the prior art. Maytal a system for protecting soft modem software, the system including a local computer having a unique key, and an external computer. The external computer receives the key from the local computer when the local computer accesses the external computer in order to download the software. *The external computer embeds information related to the key in a customized version of the software, and downloads the customized version to the local computer. The system also includes means for altering operation of the customized version. The means for altering includes at least one of a group including the following means for stopping execution of the customized version, means for limiting the operation of the customized version to a predetermined service*

*level, and means for changing data samples passing through the customized version in a magnitude and frequency which prevents useful communication. The software is written to accept at least one parameter, as is known in the art, the at least one parameter representing information related to the unique identifier. The software is then compiled with the at least one parameter as is known in the art, in order to produce the customized version (emphasis added).* For the reason above, the rejection is maintained

### **Conclusion**

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
